DETAILED ACTION

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 7, Aiello et al. appear to be the closest prior art reference.

Aiello et al. teach substantially the entire claimed structure as recited in claims 1 and 7, except a bias circuit that biases the first bipolar transistor in a reverse saturation mode when the substrate is at a potential higher than the reference potential provided by the reference potential input to which the collector of the first bipolar transistor is connected. Therefore, prior art do not teach or render obviousness the semiconductor structure, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
